31 December 2021

Message from the Guest Editors

InfoTech is an international forum for scientists, researchers and industrial experts, to share innovations, experience and new research results in the fields of information technologies and information security; technologies for system design and intelligent systems; technological aspects of e-governance and data protection, etc. The forum is a successor of the International Conference on Systems for Automation of Engineering and Research (SAER), established in 1987 and International Workshop on e-Governance and Data Protection (EG&DP), established in 2005.

The main focus of the conference is the application of information and communication technologies for the sustainable development of various and diverse spheres of society—industry, social and corporate governance, high technology, education, military affairs, ecology.

Keywords

- information technologies
- information security
- networking and communication technologies
- intelligent systems and applications
- technologies for system design and investigation
- technological aspects of e-governance and privacy
